

# Wireless on iPhone or iPad

NNU-Wireless is available to all students and faculty on campus. You will need your NNU username and password to use this service. If you do not have a username and password, please see the ITS to receive a guest account.

Make sure you are not using the NNU Default password to access NNU-Wireless. If you are:

- Log into an NNU campus computer and change your password **or**
- Go to [help.nnu.edu](http://help.nnu.edu) and click "Password Management" to change your password.

The following instructions are for iPhones, but iPads should have a similar interface.

1. Open **Wi-Fi** settings from the "Settings" menu on your iPhone or iPad
2. From the list of networks, select **NNU-Wireless**
3. Enter your NNU username and password and select **Join**
4. Accept the server authentication by selecting **Accept**
5. Your device should now be connected.

If you are not able to connect:

- Bring your device into the ITS.
- Try forgetting the network and reconnect.
- Make sure you are not using the NNU Default password.
